Draw a sketch of your artwork with a pen.

step 2

Apply lots of PUFFY MARKER to adequate spots on your sketch.

step 3

Air dry your work for 6-12 hours.

step 4

You can also use a hair dryer (with parental guidance) to puff up the colors.

USING THE HAIR DRYER

While using the hair dryer to add heat to the design, you must be supervised by an adult. Using a heat collector on the hair dryer will enable the puffing procedure to speed up. Please have the hair dryer to be 3-5 cm away from the object.
